- 25HP V-Twin gasoline engine
- Patented folding mast
- DOT Approved
- Single axle for greater maneuverability
- Easy transport, set-up and tear down
- Fully hydraulic design for ow maintenance

The **Stone Mason M50 Mobile** is a small, heavy duty production machine made for moving easily to the job. With 26-inches of cutting teeth, a 32-inch wide opening by 10-inch high opening, the HDS is well suited for processing landscape stone including flagstone, river rock, brick, block, natural stone veneer and more.

The M50 incorporates a unique pivot system allowing the operator to hydraulically lower the mast down onto the conveyor, thus lowering the center of gravity and providing a safer towing package.

Built on a specially designed, DOT approved trailer, the M50 is equipped with leveling jacks, leaf spring suspension, electric brakes, a safety breakaway system and all required lighting and can be set up and cutting stone in a matter of minutes. The gasoline engine enables the cutter to be taken to remote areas that may not have access to electricity.
