

Stone Mason Trimmer

Productive Trimming Where You Need It!

The **Stone Mason Trimmer** is a light weight portable tool designed for the landscape installer, mason contractor or production shop to eliminate the need for hand tools and sawing equipment addressing the need for accurate cutting and trimming of a **wide variety of man made** and **natural thin veneer** products. With its safe simple operation it requires minimal skill and training while adding value to any project through increased productivity, reduced injuries and low operating cost. Returns can also be seen through the preservation of materials by a reduction in waste and better materials utilization over other methods.

The Mason Trimmer incorporates an innovative independent hydraulically driven tooth design with a fixed lower blade to facilitate the cutting of a broader range of materials making it the most versatile cutter in its class. Additionally the multifunction integrated hydraulic accelerator provides improved cut speeds and pressure regulation while isolating the tools hydraulic system from damaging contaminants. Its 100 pound weight and compact size make it easy to transport and set up anywhere compressed air @ 100 PSI (12 CFM) is available.

Stone Mason Trimmer Features:

- Lightweight and portable design
- Durable all aluminum and steel construction
- Hydraulic design for low maintenance operation
- Trims man made and natural products
12 inches wide up to 2 inches thick
- Over 12 tons of cutting force
- Reversible hardened steel bottom blade
- Seven hardened steel contouring upper teeth
- Fast cycle times with integrated accelerator
- Made in USA
